

Amit Maruti Atale

Senior iOS Developer | AI-Integrated Mobile Engineer

Mobile: +91-9975573734 | E-mail: atale.amit@gmail.com | LinkedIn: <https://www.linkedin.com/in/amit-atale-407a25ba/>

Professional Summary

iOS & Flutter Developer with nearly 11 years of experience, including 9 years in iOS development and 1.8 years in Flutter. Expertise in offline database applications using SQLite, banking domain applications with SSL pinning, encryption/decryption, and secure payment integrations.

Recently expanded into Applied AI and Generative AI development with hands-on experience in Machine Learning, Deep Learning, Transformers, RAG, Large Language Models (LLMs), Vector Embeddings, Vector Databases, ChromaDB, Semantic Search, LangChain, OpenAI APIs, and Agentic AI concepts.

Experienced in developing AI-powered proof-of-concepts including JIRA duplicate ticket detection systems and PDF Question Answering applications using embeddings, vector search, and semantic similarity techniques.

Strong understanding of integrating AI capabilities into mobile applications and enterprise solutions using scalable APIs and modern AI workflows.

Technical Skills

Programming Languages	Swift, Objective-C, Dart, Flutter, Python
AI / ML	Machine Learning, Deep Learning, ANN, CNN, RNN, LSTM, Transformer, RAG, LLM, Agentic AI, Embeddings, Semantic Search
Frameworks & Tools	Xcode, Appium Inspector, Charles, Postman, FastAPI
Security	SSL Pinning, Encryption/Decryption, Secure Payment Gateway Integration
Version Control	Git, SVN
Web Services	REST, SOAP
Third-Party APIs	Firebase, Google Maps, APNS, FCM
Deployment	App Store, TestFlight, Play Store
Python Libraries & Frameworks	NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, OpenCV, Streamlit

Professional Experience

Tech Mahindra | Team Lead | Sept 2022 – Present

- Worked on Telecommunication Mobile apps like BELL and Virgin.
- Integrated Glassbox SDK for user journey analytics and crash tracking.
- Resolved Production and Regression defects.
- Built AI-based JIRA Duplicate Ticket Detection System using embeddings and semantic similarity.
- Developed PDF Question Answering system using LLM and vector search concepts.

Altimetrik (Mastercard) | Sr. Engineer - Product and Platform Engineering | May 2021 – Sept 2022

- Developed banking domain applications including Digital Wallet SDK and Issuer Simulator.
- Worked on international payment and cross-border transaction systems.
- Implemented SSL pinning and encryption for secure transactions.

Mobien Digital Pvt. Ltd. | Sr. iOS Application Developer | March 2018 – May 2021

- Developed offline database applications like WIS-FIS and AAOC using SQLite.
- Implemented offline synchronization, job tracking, and digital signatures.

NXG Labs Pvt. Ltd. | iOS Application Developer | October 2016 – March 2018

- Developed Kochi Metro App with ticket booking and QR code generation.
- Integrated payment gateways and secure transaction handling.
- Developed Wave Dating App with matching algorithms and real-time chat.

TechNex Technologies Pvt. Ltd. | iOS Application Developer | June 2015 – August 2016

- Worked on PSIS parking management application with multilingual support.

Key AI Projects

AI-Based JIRA Duplicate Ticket Detection System

- Built semantic similarity system using embeddings, cosine similarity, and vector search to identify duplicate JIRA tickets.

AI PDF Question Answering System

- Developed intelligent PDF chatbot using LLM, RAG, embeddings, and semantic search concepts.

AI Mock Interview Agent

- Developed an AI-powered Mock Interview System capable of conducting technical interviews and evaluating candidate answers intelligently.
- Integrated Large Language Models (LLMs) to generate interview questions, analyze responses, and provide detailed feedback with scoring.

Education

- MCA, Pune University, 2015
- BCS, Pune University, 2011
